Presentation Format

How to record your presentation

To record a voice over, we recommend using PowerPoint's record function or Zoom as they are easy to use.

Please click on the links below and watch the video demonstration on how to record your presentation:

<https://www.youtube.com/watch?v=XPxEw7S95cs>

<https://www.youtube.com/embed/ktJlex07MAw>

You will need a microphone, webcam, good internet connection and a quiet space (no background noise).

Ensure you have your full name and presentation title on the first slide.

Disclosure

Disclosures must be displayed at the bottom of the first slide. For example: 'Supported by a grant from...'

Naming and sending your recording prior to Congress

The virtual technical team will handle all virtual speaker requirements for the RANZCO Congress.

Once you have finalised your recording (.mp4 file), please name in the following format:

FullName_RapidFire_Date_DD_MM_Start Time of session

Example: Dani_Palmieri_RapidFire_28_02_1330

Once saved with the correct name, please upload to this link:

<https://www.dropbox.com/request/X04lc450MjGPLQXoXl3K>

Please send in your pre recording by MONDAY 7TH FEBRUARY. NO EXTENSIONS. This is so that the presentation can be checked for quality, length and then prepared for stitching and loading onto the virtual platform.

If your pre recording is not received by this date, you will be excluded from the program.

Video Clips and Photos and slide size

It is recommended your slide size for your presentation is in a 16x9 format in order to utilize the maximum screen real estate provided. Please see link below.

<https://support.microsoft.com/en-us/office/change-the-size-of-your-slides-040a811c-be43-40b9-8d04-0de5ed79987e>

Any video clips used within PowerPoint need to be embedded in your presentation. To do this drag the video onto the slide you want it on. Please size your video as big as possible if appropriate to achieve the best viewing experience. A format of mp4 is recommended but most formats are accepted in PowerPoint beyond 2016. Please check that the video has been tested before you start recording your presentation to ensure it loads correctly. Presentations with large file sizes or photographs should have the photos compressed to 96dpi for screen/web. This will decrease the file size without affecting the image quality. This feature is available within PowerPoint in the picture toolbar. When sharing your screen if using zoom to record please make sure you tick the box share with audio.

Presenters may use images in their presentations, where relevant. It is the presenter's responsibility to ensure that they have copyright to use the images in their presentations.

Presentation Tips

The calibre and professionalism of your presentation should be the same as if you are presenting on stage with a microphone and lectern.

Some general advice:

- Check your microphone and speakers before recording
- Speak clearly and loudly
- Keep a good pace
- Wear smart casual clothing if you intend to appear on the video
- Record against a plain blank wall if possible
- Ensure there is no movement happening behind you as it can be distracting
- Have your camera at face height if possible and look at the camera rather than the screen
- If you must share your screen, make sure your computer work space is 'clean' – remove any personal or sensitive information. Ensure you "Share Computer audio" if you have video clips or other multimedia content with audio the audience needs to hear. If sharing a web browser, share a NEW window without any extra tabs.
